

Muhammad Qasim Akram

Full Stack Developer | React & Node.js | Django

Bahawalpur, Pakistan | +92 312 6442266 | qasimakram46@hotmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full Stack Developer with 4 shipped, production-deployed applications across Azure, Vercel, and Railway. Built real-time, AI-integrated, and e-commerce platforms using React.js, Node.js, Django, WebSockets, and cloud CI/CD. Writes clean, reviewed code and solves deployment and architecture problems end-to-end — not just locally.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Vite, React Router v6, Context API, useReducer, CSS Modules **Backend:** Node.js, Express.js, Django, Django REST Framework, Django Channels, WebSockets, REST APIs, JWT Auth, bcrypt
Database: PostgreSQL, MongoDB Atlas, MySQL, SQLite, Redis **Cloud & DevOps:** Azure App Service, Vercel, Railway, GitHub Actions (CI/CD), Netlify
Other: Git, Python, NumPy, Pandas, C++

PROJECTS

- ChatRoom – Real-Time Chat Application | [Live](#) | [GitHub](#)

2026

Django 4.2, DRF, Django Channels, PostgreSQL, Redis, SimpleJWT, React.js, Vercel, Railway

- Solved WebSocket authentication by building custom Channels middleware that validates SimpleJWT tokens passed as query params before the connection upgrades — a non-trivial problem with no built-in Django solution.
 - Implemented Redis pub/sub to broadcast real-time events (messages, emoji reactions, notifications) across multiple Django Channels consumers; deployed backend + PostgreSQL + Redis together on Railway.
 - Shipped a 14-endpoint REST API with DRF covering rooms, messages, reactions, and notifications; tested all auth flows and WebSocket edge cases before deployment.
- DevChat – AI Developer Assistant | [Live](#) | [GitHub](#)

2026

React 19, Node.js, Express.js, MongoDB Atlas, JWT, bcrypt, Groq LLaMA 3.3-70B, Vercel, Railway

- Proxied all Groq LLaMA 3.3-70B API calls server-side so the API key never reaches the client; built 3 quick-action chips (Debug, Explain, Optimize) that reduce repeated prompt typing.
 - Managed state with Context API + useReducer and 3 custom hooks (useAutoScroll, useFormInput, useLocalStorage); implemented error boundaries and JWT/bcrypt auth with protected routes across a 3-service cloud setup.
- yourOwn – Full Stack E-Commerce Platform | [Live](#) | [GitHub](#)

2026

React 19, Node.js, Express.js, Sequelize ORM, SQLite, JWT, bcryptjs, Azure App Service, GitHub Actions

- Configured GitHub Actions CI/CD from scratch — every push to main builds, tests, and deploys to Azure App Service in under 2 minutes with zero manual steps; debugged Azure deployment env variable issues that took 2 days to trace.
 - Built a 14-endpoint REST API across 4 modules (products, cart, orders, payment) with JWT auth, bcryptjs password hashing, 7-day token expiry, and protected routes across all signup, login, and session flows.

EDUCATION

Islamia University of Bahawalpur — BS Computer Science (6th of 8 Semesters) Sep 2023 – Sep 2027
Relevant Coursework: Web Engineering, DSA, DBMS, OOP, Theory of Automata, Parallel Computing, Compiler Construction, Computer Vision

CERTIFICATIONS

Advanced MySQL Topics — Meta | [Verify](#) Sep 2025
Supervised Machine Learning: Regression & Classification — Stanford / DeepLearning.AI | [Verify](#) Dec 2025
Python for Data Science, AI & Development — IBM | [Verify](#) Oct 2025
